The following is a statement of reasons for the indication of allowable subject matter:

Claims 1-21 are allowed because the prior art did not teach or reasonably suggest a method for use in a networked computing environment for providing imaging services in response to a request for an imaging job, comprising: providing an information store, said information store comprising (1) one or more virtual device server groups, each comprising one or more virtual device servers, and (2) one or more virtual imaging device groups, each comprising one or more virtual imaging devices, each of said virtual device server groups being associated with a physical imaging server group comprising one or more physical imaging servers, each of said virtual device servers in a virtual device server group being associated with a physical imaging server of a corresponding physical imaging server group, each of said virtual imaging device being associated with one or more physical imaging device; and allocating said imaging job to one of said virtual imaging devices and one of said virtual device servers for processing at one of said physical imaging devices. Allocating imaging job queues from the central file share to one of the virtual device servers and one of the virtual imaging devices for processing as claimed in claims 18-19 are novel and allowable over the cited prior art of record. Also, enabling fail-over and managing and balancing as claimed in claim 17 is allowable over the cited art of record. Furthermore, schema representation as claimed in claims 12, and 20-21 are novel and allowable over the cited art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
